## CORDLESS SOLDERING IRON EZ CHANGE

The power of an industrial iron with the convenience of standard rechargeable nickel cadmium batteries.

The versatile EZ Change cordless soldering iron gives you extended soldering times (with a spare set of batteries); up to 125 electronic joints per charge; a tip protector and compartment for extra tips; and it lets you recharge batteries in any standard NiCd charger. Optional battery charger (No. 7675) sold separately.

### Plus these standard Iso-Tip features:

Up to 900° F in just 10 seconds; insulated tip design to prevent damaging electrical leaks; DC soldering equivalent of a 25 watt AC unit.

### Tips to match any job.

**No. 7535**  
Regular Tip  
#5 (5/32")

**No. 7545**  
Fine Tip  
#2 (1/16")

**No. 7546**  
Heavy Duty Tip #6  
High Wattage (1/16")

**No. 7566** - Micro  
Soldering Tip  
#2 (1/16")

**No. 7571** - Beveled Tip  
Regular Tip  
#2 (1/16")

**No. 7577** - Chisel Tip  
#5 (5/32")

### EZ CHANGE Battery Performance Information

Battery Type	Maximum Tip Temperature	Avg. Heat Up Time (Seconds)	Run Time (minutes)
Ni-Cad 1400 mAh	500° C - 932° F	11	19
Ni-Cad 1500 mAh	450° C - 842° F	12	20
Ni-Cad 1600 mAh	470° C - 878° F	9	20
Ni-Cad 2300 mAh	425° C - 797° F	12	32
Ni-Cad 2200 mAh	450° C - 842° F	9	27

Note: Iron was tested using #7545 Fine Tip

Ni-Cad 1400 mAh	530° C - 932° F	10	13.5
Ni-Cad 1500 mAh	500° C - 842° F	15	14.5
Ni-Cad 2300 mAh	450° C - 842° F	15	24

Note: Iron was tested using #7546 Fine Tip

Iron performance testing based on continuous run time.  
Soldering iron performance will vary using different tip styles.

**WARNING: Do NOT use Alkaline batteries with this product.**

### EZ Change Iron

MODEL 7670

Includes industrial quality EZ Change iron, #7545 fine tip, (2) 1400mAh (size C) rechargeable nickel cadmium batteries, tip protector, instructions, and limited one year warranty. (Optional battery charger sold separately.)

### Universal Ni-Cad Battery Recharger

MODEL 7675

Slim line design with LED recharges any brand of nickel cadmium batteries.

- Special circuitry prevents overcharging
- Re-use batteries up to 1,000 times
- Charge up to 4 batteries at a time:  
AAA, AA, C & D batteries in 5 hours;  
9V batteries in 14 hours
- 120V/60Hz; 8 watts
