BUTANE POWERED Micro-Therm Portable Flameless Heat Gun

MODEL 7975

The portable Micro-Therm is compact and portable, easy to operate, and a must-have for every tool kit. With the piezo electronic ignition, it is ready to use within ten seconds and a flameless heat reaches up to 1200° F - 650° C. Use the deflector when shrink tubing to achieve higher heat efficiency for quicker results. The deflector also protects surrounding components from heat. The replaceable cartridges offer 20 minutes of continuous use. This product is ETL approved and has a safety lock to prevent accidental turn on.

Great for:

- Odd jobs
- Shrink tubing
- Activate adhesives & potting compounds
- PVC bending
- Preheat flux
- Stretch & repair vinyl
- General heating & drying
- Removes windshield caulking
- Shrinks & terminates heat shrinkable insulator
- Frozen locks
- Bends and forms plastics and plastic laminates

BUTANE POWERED EZ-Torch Portable Flameless Heat Gun

MODEL 7978

The compact size and portability of the EZ-Torch makes this unit a must for tool kits, household, first aid, and survival kits. The piezo electronic ignition makes it easy to operate. Temperatures reaching up to 2500° F - 1300° C, this product's windproof and weatherproof flame makes camping and outdoor use convenient and practical. The replaceable cartridge instantly offers 20 minutes of continuous use. This product is ETL approved and has a safety lock to prevent accidental turn on.

Great for:

- Soldering
- Brazing
- Laboratories
- Hobbies
- Do-it-yourself repairs
- Fireplace
- Cigars
- First aid kits
- Campfires
- Tool kits
